Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The preliminary amendment filed on 7/9/2004 has been entered. Claims 1-26 have been canceled. Newly added claims 26-59 are presented for examination.

It is noted that claims 26-59 have been renumbers as claims 27-60 since the original set of claims comprises claims 1-26.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 27-50, 52 (also noted that 52 lack a proper antecedent basis) and 57-58, drawn to a wireless portable data terminal and system, classified in class 235, subclass 472.01.
- II. Claims 51 and 53-56 drawn to an integrating development and deployment environment, classified in class 235, subclass 462.25.
- III. Claims 59-60, drawn to method of developing an application program, classified in class 235, subclass 375.

The inventions are distinct, each from the other because of the following reasons:

Inventions Groups I, II and III are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as

Art Unit: 2876

claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the PTD system can be designed in at different environments. The subcombinations have separate utility such as the method of developing an end user application can be used to develop other software application other than the application used by the system as recited in Group I; the software as recited in Group III can be used in scanning system which does not require the specific operations of Group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thien M. Le whose telephone number is (571) 272-
